Hyderabad, India

Software Engineer with 5+ years of experience building scalable enterprise web applications using React.js, Next.js, Angular, Node.js, TypeScript, and AWS. Passionate about performance engineering, AI-assisted development, and Data Structures & Algorithms.

- React.js
- Next.js
- Angular
- Redux
- JavaScript
- TypeScript
- Node.js
- Tailwind
- MUI
- Three.js
- Data Structures and Algorithms
- Playwright Automation
- MongoDB
- Express
- AWS

WORK EXPERIENCE

Software Engineer 2-Divami Design Labs Apr 2023 - Present

- **Led frontend architecture** for BlueYonder's enterprise Sales Portal, delivering 4 business-critical modules across 5 global regions, enabling faster feature rollouts and improving platform scalability.
- Co-architected interactive dashboards processing large sales datasets, implementing caching and optimized state management that reduced initial page **load times by 40%**, resulting in faster business reporting and improved analyst productivity.
- Designed and maintained frontend-to-backend integrations using React, Next.js, Node.js, and 20+ REST APIs, supporting deployments across **3 global AWS regions**.
- Automated CI/CD pipelines using GitHub Actions and Jenkins, enabling zero-downtime deployments across 5 production environments and eliminating manual release overhead.
- Developed a modular MedNote generation workflow for a healthcare platform supporting **1,000+ concurrent users**, improving maintainability through decoupled architecture and reusable components.
- **Used AI agents** to detect edge cases and refactor business logic and engineered an in-house license management tool with push/email notifications and payment gateway integration.

Software Development Engineer 1-PerspectAi Aug 2021 - Mar 2023

- **Designed and developed** three interactive canvas/DOM-based **cognitive assessment games** using React and Redux Toolkit, increasing user session times and engagement metrics.
- Led data instrumentation efforts to track user behavior, enabling product teams to make data-driven decisions that increased **overall platform engagement by 30%**.
- **Delivered responsive UI** for candidate and admin portals and established automated unit testing workflows that **reduced cross-browser and device-specific production bugs by 40%**.
- **Collaborated with front-end team** to enhance portal pages and introduce features that improved user engagement.

PROJECTS

MIT Bitcoin Expo 2026 4 Months

- Engineered the [Official Site](#) with a team of 5 members for the 13th Annual MIT Bitcoin Expo using modern frontend technologies.
- Implemented a 3D star-field background and interactive animations with React Three Fiber and Framer Motion to enhance user engagement.
- Delivered a fully responsive, SEO-optimized site deployed on Vercel with analytics and sitemap generation.

SkillBridge AI 4 Months

- Built a production-ready PWA with 70+ components, 14 API endpoints, and integrated ElevenLabs voice synthesis with multiple professional voices and real-time waveform visualization [Live Demo](#)
- Created a drag-and-drop learning path builder with AI-powered skill assessment and implemented real-time job market analytics and salary benchmarking.

EDUCATION

B.Tech / B.E. | Computer Science and Engineering (CSE) 2022
Jaypee University of Engineering and Technology (JUET), Guna
Grade - 7.8/10

ACHIEVEMENTS

- Internal Hackathon Winner**
Won internal hackathon by building an in-house asset management web application using AI-assisted development for hardware asset tracking, license management, expiry monitoring and custom notifications.
- Star Performer Award**
Awarded Star Performer of the Month for delivering a batch of features and fixing a production issue within 24 hours.
