WORK EXPERIENCE

Software Engineer 2-Divami Design Labs

Apr 2023 - Present

- Led frontend system architecture and engineering for BlueYonder's enterprise Sales Portal, collaborating with US-based product teams to design and ship multiple business-critical modules.
- Co-architected data-dense interactive dashboards for enterprise clients, implementing advanced state management and data-caching strategies that **reduced initial page load times by 40%**.
- Designed and maintained frontend-to-backend integrations using React.js, Next.js, and Node.js, deployed across AWS infrastructure.
- Engineered and optimized automated CI/CD pipelines with GitHub Actions and Jenkins, achieving **zero-downtime delivery across 5 production environments over 4 consecutive quarters**.
- Collaborated on a high-traffic healthcare application serving over **1,000+ active concurrent users**, building a modular MedNote generation system across decoupled modules.
- **Used AI agents** to detect edge cases and refactor business logic and built an in-house license management tool with push/email notifications and payment gateway integration.

Software Development Engineer 1-PerspectAi

Aug 2021 - Mar 2023

- **Designed and developed** three interactive canvas/DOM-based **cognitive assessment games** using React and Redux Toolkit, increasing user session times and engagement metrics.
- Led instrumentation for analytics (Google Analytics, Microsoft Clarity), establishing event-tracking schemas that **improved user behavior** insights by **30%**.
- **Delivered responsive UI** for candidate and admin portals and established automated unit testing workflows that **reduced cross-browser and device-specific production bugs by 40%**.
- **Collaborated with front-end team** to enhance portal pages and introduce features that improved user engagement.

PROJECTS

MIT Bitcoin Expo 2026

4 Months

- Built the [Official Site](#) with a team of 5 members for the 13th Annual MIT Bitcoin Expo using modern frontend technologies.
- Implemented a 3D star-field background and interactive animations with React Three Fiber and Framer Motion to enhance user engagement.
- Delivered a fully responsive, SEO-optimized site deployed on Vercel with analytics and sitemap generation.

SkillBridge AI

4 Months

- Built a production-ready PWA with 70+ components, 14 API endpoints, and integrated ElevenLabs voice synthesis with multiple professional voices and real-time waveform visualization [Live Demo](#)
- Developed a drag-and-drop learning path builder with AI-powered skill assessment and implemented real-time job market analytics and salary benchmarking.

EDUCATION

ACHIEVEMENTS

Internal Hackathon Winner

Won internal hackathon by building an in-house asset management web application using AI-assisted development for hardware asset tracking, license management, expiry monitoring and automated notifications.

Star Performer Award

Awarded Star Performer of the Month for delivering a batch of features and fixing a production issue within 24 hours.
